1 [Extending the RMON matrix group to provide network layer statistics](#)

Gerald A. Winters, Toby J. Teorey

 October 1994 **Proceedings of the 1994 conference of the Centre for Advanced Studies on Collaborative research**

Publisher: IBM Press

Full text available: pdf(179.96 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Simple Network Management Protocol SNMP is an application level protocol developed for the Internet suite of protocols. It is a connectionless protocol that provides a basic, easily implemented network-management tool for TCP/IP-based environments. With the current Internet management information base standard for SNMP (MIB-II) a network manager can obtain information that is local to a managed device. However, a manager cannot easily learn about traffic as a whole on the LAN. A valuable addi ...

2 [Shadowed management of free disk pages with a linked list](#)

Matthew S. Hecht, John D. Gabbe

 December 1983 **ACM Transactions on Database Systems (TODS)**, Volume 8 Issue 4

Publisher: ACM Press

Full text available: pdf(877.39 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe and prove correct a programming technique using a linked list of pages for managing the free disk pages of a file system where shadowing is the recovery technique. Our technique requires a window of only two pages of main memory for accessing and maintaining the free list, and avoids wholesale copying of free-list pages during a checkpoint or recover operation.

Keywords: checkpoint, dynamic storage allocation, file system, recovery, shadowing, storage management

3 [Smallest-last ordering and clustering and graph coloring algorithms](#)

David W. Matula, Leland L. Beck

 July 1983 **Journal of the ACM (JACM)**, Volume 30 Issue 3

Publisher: ACM Press

Full text available: pdf(650.32 KB)

 Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)
